HOW TO USE THIS CATALOG TO FIND THE CORRECT REPLACEMENT PART:

- 1°- Identify the exact model for which you wish to obtain the replacement part by the means of the table "Model".
- 2°- Identify the engine or frame serial number from the machine for which you need the replacement part.
- 3°- With this information, refer to the diagram which contains the part you need "Figure" column will be used to determine the correct "Code" number, having in mind the model and engine or frame number.

The technical department of DERBI reserves the right to make modifications and improvements to their machines without prior notice.

These variations will be indicated on the parts diagram by an asterisk (*) between the "figure" and "code" columns, with the serial numbers that begin the new variation; above will be signaled the part before mounted and we will periodically remit updates of the latest improvements with their corresponding numbers.

- If not any code number follows the asterisk (*) in the "Figure" column, this means:
a) If they do not coincide, this means that from the serial engine or frame number signaled by an asterisk (*), the part is no more mounted.
