are available in the following colors:

silver	RAL	9006	color-code-number	90
candy red	Puch	3052 T	color-code-number	45
dull black			color-code-number	31

When ordering laquered parts, please do not forget to state the matching color-code-number along with the spare-part-number

e.g. 359.1.22.000.2

/90

I M P O R T A N T

To get a quick and correct shipment of your spare parts orders following statements are necessary:

1. Exact description of vehicle
2. Engine no.
3. Spare parts no.
4. Description
5. Colour
6. Required quantity
7. Wanted way of delivery

Beside this our general terms of sale and delivery are valuable.

Please direct your orders to:

place for stamp

G E N E R A L E X P L A N A T I O N S

Statements such as "left", "right", "front", "rear" at the description of spare parts are referring to the moving direction of vehicle. The given dimensions (in mm) for particular parts have to be considered as standards. (To convert millimeters to inches, multiply by 0,03937).

A reference number bracketed on the illustrated page means that this number appears several times on the illustrated page.

A ref.no. within brackets before a spare part means, that the said part is only similar to the illustration.

The abbreviation "as requd." means "as required"; the abbreviation "p.m." means "per meter".

Puch is continuously reviewing its products for possible improvement and reserves the right to change details and specifications without notice.

EXPLANATION OF THE SPARE PARTS CLASSIFICATION NUMBERS

To facilitate the systematic arrangement of the various spare parts in your spares depot, the system of classification by numbers is explained below.

Types of numbers:

A E.g. 900.1028

a so-called "900-number" given to standard parts, commercial parts and electrical equipment parts.

B E.g. 24865

a 2-5 figure number. (Such numbers used to be given to the spares of models manufactured in the past. Insofar as such parts are used in currently produced machines, these numbers will still appear in the spares lists.)

C. E.g. 349.1.40.802.0
 .1
 etc.

a 7 - 10 figure number. From the composition of this number the following information can be deduced:

Model (e.g. MAXI, MAGNUM)

Alteration number (used when a part is differently designed or no longer interchangeable with its predecessor).

Construction group (e.g. front wheel)

Part-number (e.g. front wheel hub)

.0 Figure indicating assembled parts (e.g. hub complete with all fittings).

.1 to .9 serve for various purposes

TYPE NUMBER FOR MAGNUM IS 321
